

**Pierce County Beekeepers Association**

Catalog of titles with brief description of book's subject

| Title  | Author                          | Year | ISBN              | Book Purpose   |
|--|---------------------------------|------|-------------------|--|
| Mastering the Art of Beekeeping (2 copies)   | Aebi, Ormond and Harry          | 1979 | 0-913300-42-X     | This book (from the authors of The Art and Adventure of Beekeeping) lays bare the tips, secrets, and innovative experiments that have allowed them to obtain phenomenally large yields of honey and the Guinness World's Record for the most wildflower honey from a single hive (404 pounds).   |
| The Art and Adventure of Beekeeping (3 copies)   | Aebi, Ormond and Harry          | 1975 | 0-913300-39-X     | Explaining not only the how but the when of beekeeping, guaranteeing the greatest honey yield, the Aebis from a lifetime of experience offer insights into the inner life of the hive, the language of bees, gathering and gentling wild swarms as well as methods for preparing and maintaining healthy hives.  |
| The Life of the Bumblebee  | Alford BSc PhD, DV              | 1978 | 0-0228-X          | The book is designed for the general reader telling the remarkable story of the life of the bumblebee. Nest building, the establishment and development of bumblebee colonies, brood rearing, foraging, courtship, winter survival, and the ravages of various natural enemies, are all described and to complete the picture, brief details are also given of each of the twenty five British bumblebee species.  |
| Bee Prepared with Honey  | Andersen, Arthur W              | 1975 |                   | 140 delicious honey recipes plus a guide to backyard beekeeping.   |
| Honey Bee Pathology  | Bailey, Leslie                  | 1981 | 0-12073480-X      | The book contains separate chapters on viruses, bacteria, fungi, protozoa, mites, nematoid and insect parasites, non-infections diseases, and treatment of diseases. Apart from its value for beekeeping and apicultural research, this book will also be of interest to ecologists, microbiologists, virologists, parasitologists and general entomologists.  |
| Honey and Your Health  | Beck M.D., Bodog and Doree Smed | 1944 |                   | The book treats thoroughly the story of honey. Honey as a remedy, honey as a sweet, honey as a delicious ingredient in many new recipes.   |
| Beeswax Crafting   | Berthold Jr, Robert             | 1993 | 1-878075-02-0     | Educational information about what beeswax is and crafts to do with it.  |
| Robbing the Bees: A Biography of Honey - the Sweet Liquid Gold that Seduced the World (2 copies) | Bishop, Holley                  | 2005 | 1-4193-3963-X     | Part biography, part history, <i>Robbing the Bees</i> is also a celebration, a love letter to bees and their magical produce. Honey has played significant and varied roles in civilization: it is so sweet that bacteria can't survive in it, so it was our first food preservative and all-purpose wound salve. Honey wine, or mead, was the intoxicant of choice long before beer or wine existed. Hindus believe honey leads to a long life; Mohammed looked to honey as a remedy for all illness. Virgil; Aristotle; Pythagoras; Gregor Mendel; Sylvia Plath's father, Otto; and Sir Edmund Hillary are among the famous beekeepers and connoisseurs who have figured in honey's past and shaped its present. |
| Building Beehives for Dummies  | Blackiston, Howland             | 2013 | 978-1-118-31294-0 | This book provides information to successfully plan and build beehives and other accessories including what type of hive to build, hints on how to maintain your equipment, what bees need to stay happy and healthy, where to locate your hives, and more.  |
| Handmade Candles   | Blake, Jane and Emily Paulsen   | 1998 | 1-58816-417-9     | Recipes for crafting candles at home   |

| Title  | Author  | Year | ISBN              | Book Purpose   |
|--|---|------|-------------------|--|
| Plan / bee   | Brackney, Susan                                   | 2009 | 978-0-399-53496-6 | Overtaxed and underrecognized-and now disappearing in alarming numbers- bees are the unsung heroes of the food chain, essential for the pollination of more than ninety of the crops we eat. The hardworking, humble, and matriarchal bee finally gets her due in this engaging and expertly written guide that will appeal to anyone who's ever been curious about the mysterious and always-buzzing world of bees.   |
| Mead   | Brother Adam                                      | 1978 |                   | Pamphlet on how to prepare mead.   |
| The Forgotten Pollinators  | Buchmann, Stephen and Gary Paul                   | 1996 | 1-55963-352-2     | In <i>The Forgotten Pollinators</i> , Stephen L. Buchmann, one of the world's leading authorities on bees and pollination, and Gary Paul Nabhan, award-winning writer and renowned crop ecologist, explore the vital but little-appreciated relationship between plants and the animals they depend on for reproduction -- bees, beetles, butterflies, hummingbirds, moths, bats, and countless other animals, some widely recognized and other almost unknown.  |
| Letters from the Hive: An Intimate History of Bees, Honey, and Humankind | Buchmann, Stephen and Repplier,                   | 2005 | 0-553-80375-1     | In <i>Letters from the Hive</i> , Prof. Stephen Buchmann takes us into the hive--nursery, honey factory, queen's inner sanctum--and out to the world of backyard gardens, open fields, and deserts in full bloom, where the age-old sexual dance between flowers and bees makes life on earth as we know it possible. Hailed for their hard work, harmonious society, and, mistakenly, for their celibacy, bees have a link to our species that goes beyond biology. In <i>Letters from the Hive</i> , Buchmann explores the fascinating role of bees in human culture and mythology, following the "honey hunters" of native cultures in Malaysia, the Himalayas, and the Australian Outback as they risk life and limb to locate a treasure as valuable as any gold. |
| Nectar and Pollen Plants of Oregon and the Pacific Northwest             | Burgett, D.M., Stringer, B.A., and Johnston, L.D. | 1989 | 0-9624785-0-4     | An illustrated dictionary of plants used by honey bees   |
| The Practical Beekeeper Volume III Advanced Beekeeping Naturally         | Bush, Michael                                     | 2004 | 978-161476-063-4  | This book is about how to keep bees in a natural and practical system where they do not require treatments for pests and diseases and only minimal interventions.  |
| Begin to Keep Bees (2 copies)  | Carrier, Franklin H                               | 1982 |                   | Written for the beginning hobbyist beekeeper. The book differs from most beekeeping books in that it concentrates only on those activities and manipulations which may concern you during your first year of beekeeping.   |
| Beeswax: Production, Harvesting, Processing and Products                 | Coggshall, William L and Roger A Mc               | 1995 | 1-878075-06-3     |  |
| Bee Sex Essentials   | Connor, Lawrence. John                            | 2008 | 1-878075-22-5     | The book describes the complex biology involved in the reproductive process of honey bees and how to incorporate this knowledge into their hive management plans.  |
| Queen Rearing Essentials (2 copies)                                      | Connor, Lawrence. John                            | 2009 | 1-878075-23-3     | At the request of readers and instructors, Dr. Connor has added sixty more pages of techniques and queen management ideas. He has expanded the concept of the queenless builder colony for use by those beekeepers who want to graft more frequently. This book will help you if you only need a few queens a year, or if you want to produce hundreds or thousands.   |

| Title   | Author                               | Year | ISBN              | Book Purpose   |
|---|--------------------------------------|------|-------------------|--|
| Natural Beekeeping: Organic Approaches to Modern Apiculture | Conrad, Ross                         | 2007 | 978-1-933392-08-0 | <p>The various chemicals used in beekeeping have, for the past decades, held Varroa Destructor, a mite, and other major pests at bay, but chemical-resistance is building and evolution threatens to overtake the best that laboratory chemists have to offer. In fact, there is evidence that chemical treatments are making the problem worse. Natural Beekeeping flips the script on traditional approaches by proposing a program of selective breeding and natural hive management.</p> <p>Conrad brings together the best organic and natural approaches to keeping honeybees healthy and productive here in one book. Readers will learn about nontoxic methods of controlling mites, eliminating American foulbrood disease (without the use of antibiotics), breeding strategies, and many other tips and techniques for maintaining healthy hives. Conrad's reservoir of knowledge comes from years of experience and a far-flung community of fellow beekeepers who are all interested in ecologically sustainable apiculture. Specific concepts and detailed management techniques are covered in a matter-of-fact, easy to implement way.</p> |
| The World History of Beekeeping and Honey Hunting           | Crane, Eva                           | 1999 | 0-415-92467-7     | This comprehensive book represents the first attempt to write a world history of people's use of social bees: how bees' nests were initially hunted for their honey and wax and, later, how the bees were kept in purpose-made hives. Evidence survives from early times in the form of artefacts, pictures and written records, and also human traditions of dealing with bees. Since 1949 the author has had opportunities to travel in over sixty countries, and to see traditional and modern hive beekeeping and also honey collection from nests. She learned much that helped her to piece together some of the long history in the different continents.   |
| Pollination Directory for World Crops                       | Crane, Eva; Walker, Penelope         |      | 0-86098-143-6     |  |
| Directory of Important World Honey Sources                  | Crane, Eva; Walker, Penelope and U   | 1984 | 0-86098-141-X     | This book identifies 467 plants that are reported, somewhere in the world, to be a major source of the honey produced there. Some of these honey sources are widespread, such as lucerne (alfalfa) and many of the eucalypts; others are confined to a single area such as plectranthus which grows only on certain slopes of the western Himalayas.   |
| Top-Bar Beekeeping: Organic Practices for Honeybee Health   | Crowder, Les and Harrell, Heather    | 2012 | 978-1-60358-461-6 | <p>Top-bar hives yield slightly less honey but produce more beeswax than a typical Langstroth box hive. Regular hive inspection and the removal of old combs helps to keep bees healthier and naturally disease-free. Top-Bar Beekeeping provides complete</p>   |
| First Lessons in Beekeeping                                 | Delaplane, Keith                     | 2007 | 978-0-915698-12-7 | First Lessons in Beekeeping introduces the prospective beekeeper to the basics of beekeeping through easy-to-understand text and numerous color photos on honey bee biology, beekeeping equipment, management, honey production and processing, as well as disease diagnosis and treatment.  |
| Honey Bee Diseases & Pests (3 copies)                       | Dixon, D; Jay, SC; Otis, G; Winston, | 1993 |                   | Magazine form. Produced by Canadian Association of Professional Apiculturists.   |
| Beemasters of the Past                                      | Dodd, Victor                         | 1983 | 0-907908-09-8     | Highlights of some of the men and women who have contributed to the craft of beekeeping over the years.  |
| Honeycomb Candles   | Dubin, Sidney                        | 1960 |                   |  |
| Beekeeping  | Eckert, John E and Frank R. Shaw     | 1977 |                   |  |
| Beekeeping: Questions & Answers (2 copies)                  | Edited by Dadant & Sons              | 1978 | 0-915698-04-8     |  |

| Title   | Author                                     | Year | ISBN              | Book Purpose   |
|---|--|------|-------------------|--|
| 500 Answers to Bee Questions  | Edited by the Editorial Staff of Gleanings | 1975 |                   | Questions pertain to bee behavior, colony management, products of bees and handling and marketing of honey   |
| The Honey Cookbook  | Elkon, Juliette                            | 1955 |                   | Contains more than 250 unusual recipes.  |
| Sweetness and Light   | Ellis, Hattie                              | 2004 | 1-4000-5405-2     | Social history, popular science, traveler's tales woven into chronological narrative of the history of the honey bee.  |
| Honey - Nature's Wonder Ingredient  | Fleetwood, Jenni                           | 2008 |                   | 100 uses from traditional cures to food and beauty with tips, hints and 40 recipes   |
| The Backyard Beekeeper's Honey Handbook: A Guide to Creating, Harvesting, and Cooking with Natural Honeys | Flottum, Kim                               | 2009 | 978-1-59253-474-6 | This book has hive hints and honey-harvesting tutorials. Also an illustrated guide to honey plants explores their regional bloom dates and honey flows in detail. A wide array of honey-handling equipment is illustrated, explained, and reviewed. Includes more than 50 healthy recipes for both sweet and savory dishes featuring honey.  |
| Bees and Mankind  | Free, John B                               | 1982 | 0-04-638001-9     | This book attempts to provide an account of the biology of bees, and to trace man's interest in them from prehistoric times to the present day.  |
| What You Should Know About Honey  | Gojmerac, Walter                           | 1981 |                   |  |
| Bees, Beekeeping, Honey and Pollination   | Gojmerac, Walter                           | 1980 | 0-87055-342-9     |  |
| The Orchard Mason Bee   | Griffin, Brian                             | 1999 | 0-9635841-2-X     | Information to capture and raise pollinating bees in your own backyard.  |
| Humblebee Bumblebee   | Griffin, Brian                             | 1997 | 0-9635841-3-8     | The life story of the bumblebees and their use by the backyard gardener.   |
| Honey Bee Brood Diseases (2 copies)   | Hansen, Henrik                             |      | 87-87905-04-3     |  |
| Honey: Over 75 Farm Fresh Recipes   | Hatherleigh Press                          | 2012 |                   |  |
| A Case of Hives   | Heath, Len                                 | 1985 | 905652-10-X       | In a book for both beginners and experienced bookeepers, Prof. Len Heath has put together the pros and cons of the different types of hives used in Britain today.   |
| The Thinking Beekeeper  | Henebway, Christy                          | 2013 | 978-0-86571-720-6 | The Thinking Beekeeper is the definitive do-it-yourself guide to natural beekeeping in top bar hives. Based on the concept of understanding and working with bees' natural systems as opposed to trying to subvert them. The book emphasizes the intimate connection between our food systems, bees, and the well-being of the planet.   |
| Guide to Bees and Honey (2 copies)  | Hooper, Ted                                | 1976 | 0-87857-177-9     | This is the ideal guide for anyone wanting to start beekeeping and a revered reference book for experienced beekeepers. It includes information on all you need to know, including how to avoid swarms, plan requeening, or provide the colony with winter stores. It features key information on Varroa. It is copiously illustrated throughout. Fully revised and updated, this new edition of "Guide to Bees and Honey" also presents expert advice for readers who plan to maintain a few hives for personal recreational use, as well as those who want to expand an existing colony into a commercial venture. |

| Title   | Author                                 | Year | ISBN           | Book Purpose   |
|---|--|------|----------------|--|
| Bees in America: How the Honey Bee Shaped a Nation  | Horn, Tammy                            | 2005 | 0-8131-9163-7  | Honey bees - and the qualities associated with them - have quietly influenced American values for four centuries. During every major period in the country's history, bees and beekeepers have represented order and stability in a country without a national religion, political party, or language. <i>Bees in America</i> is an enlightening cultural history of bees and beekeeping in the United States. Tammy Horn, herself a beekeeper, offers a varied social and technological history from the colonial period, when the British first introduced bees to the New World, to the present, when bees are being used by the American military to detect bombs. Still a powerful representation of success, the industrious honey bee continues to serve both as a source of income and a metaphor for globalization as America emerges as a leader in the Information Age. |
| More than Honey (a DVD)   | Imhoof, Markus                         | 2013 |                | This film tackles the issue of why bees, worldwide, are facing extinction.   |
| XXVIIth International Congress of Apiculture of Apimondia                                   | International Federation of Beekeepers | 1981 |                | Publication of exhibits and activities of this Congress.   |
| Fruitless Fall: The Collapse of the Honey Bee and the Coming Agricultural Crisis (2 copies) | Jacobsen, Rowan                        | 2008 | 1-59691-537-4  | Rachel Carson predicted a silent spring, but she also warned of a fruitless fall, a time with no pollination and no fruit. The fruitless fall nearly became a reality when, in 2007, beekeepers watched thirty billion bees mysteriously die. And they continue to disappear. The remaining pollinators, essential to the cultivation of a third of American crops, are now trucked across the country and flown around the world, pushing them ever closer to collapse. <i>Fruitless Fall</i> does more than just highlight this growing agricultural catastrophe. It emphasizes the miracle of flowering plants and their pollination partners, and urges readers not to take the abundance of our Earth for granted. A new afterword by the author tracks the most recent developments in this ongoing crisis.  |
| Beekeeping Tips and Topics: The Best of Bees and Honey 1975-1981 (2 copies)                 | Jaycox, Elbert                         | 1982 |                | The author is a beekeeper who published a newsletter called Bees and Honey. This book is a compilation of the best articles from that magazine. Its information is provided for amateur beekeepers.  |
| Beekeeping in the Midwest   | Jaycox, Elbert                         | 1976 |                |  |
| Some Important Operations in Bee Management (2 copies)                                      | Johansson, TSK and MP                  | 1978 | 0 86098 029 4  | This book starts where many books on beekeeping leave off. Each chapter is devoted to a subject of importance to the beekeeper in getting the best return from his bees.   |
| Natural Medicine from Honey Bees (Apitherapy)   | Kaal, Jacob                            | 1991 | 90-9004522-8   | The book contains an impressive international bibliography and a systematic, detailed record of known and potential medicinal properties of bee products. Propolis had become a forgotten substance in the West for over a century, until the 1960s, and Jacob was determined to promote its varied medicinal powers. Being a beekeeper, his research always touched ground with the life and wellbeing of bees and people.  |
| How to Keep Bees and Sell Honey   | Kelley, Walter T                       | 1975 |                |  |
| The Secret Life of Bees   | Kidd, Sue Monk                         | 2002 | 0-14-20.0174-0 | Set in South Carolina in 1964, <i>The Secret Life of Bees</i> tells the story of Lily Owens, whose life has been shaped around the blurred memory of the afternoon her mother was killed. When Lily's fierce-hearted "stand-in mother", Rosaleen, insults three of the town's fiercest racists, Lily decides they should both escape to Tiburon, South Carolina - a town that holds the secret to her mother's past. There, they are taken in by an eccentric trio of black beekeeping sisters who introduce Lily to a mesmerizing world of bees, honey, and the Black Madonna who presides over their household.  |

|---|------------------------------------|------|---------------|---|
| Honey in the Comb   | Killion, Eugene                    | 1981 | 0-915698-08-0 | The basics of producing comb honey by the Killion method, including equipment, swarm control, queen rearing, and colony management etc.   |
| A Colour Guide to Pollen Loads of the Honey Bee                           | Kirk, William                      |      |               | Beekeepers everywhere are fascinated by the sources of pollen brought back to the hive by their bees. Being able to identify the plants producing this pollen is the key to unlocking important information about bee forage in your area. Dr. Kirk and his team have collected pollen loads from Britain and Germany giving us evidence of the natural variation in the colors seen at the hive entrance. The guide contains a key of 500 colors, and describes the pollen loads of 268 plant species found in Europe. |
| The Cobana Handbook   | Kozlowicz, Stanley                 | 1979 |               | A manual about Cobana equipment.  |
| Bees  | Lectures by Rudolf Steiner         | 1998 | 0-88010-457-0 | Bees is essential reading for anyone interested in understanding the true nature of the honeybee, as well as those who wish to heal the contemporary crisis of the beehive.   |
| Bees and the Law (2 copies)   | Loring DVM JD, Murray              | 1981 | 0-915698-07-2 | The author, Murray Loring, is not only an attorney, he is an accredited veterinarian. He has written this book with the layman in mind.   |
| Honey Plants Manual (2 copies)  | Lovell, Harvey B                   | 1966 |               | Flowers arranged according to their chief colors to make it easier to identify the plants. Includes photographs.  |
| Bees Don't Get Arthritis  | Malone, Fred                       | 1979 | 0-914960-60-1 | This book is a well researched and surprisingly entertaining investigation into the healing powers of various products of the honey bee.  |
| The Golden Pollen: Nature's Unique Force of Life                          | McCormick, Marjorie                | 1960 |               | This book includes reports about the greatest natural raw food re-discovery in 100 years.   |
| Essentially Candles   | McDaniel, Dr. Robert and Katherine | 2001 | 0-87341-996-0 | The elegant art of candle making and embellishing   |
| The Beekeeper's Handbook: A Practical Manual of Bee Management (2 copies) | Meyer, Owen                        | 1983 | 0-7225-0669-4 | Includes sections on bee behavior, anatomy, pollination, swarming and reproduction, queen rearing, honey harvest, diseases and pests, and microscopy and dissection.  |
| The Bee Book  | More, Daphne                       | 1976 | 0-87663-245-2 | The history and natural history of the honeybee.  |
| The Complete Guide to Beekeeping (2 copies)                               | Morse, Roger A.                    | 1974 | 0-87690-126-7 | Revised edition to a practical guide to successful beekeeping. Includes a chapter on mead, the wine made from honey, with easy-to-follow instructions for the home winemaker. The book offers full instructions on how to begin an apiary, starting with advice on appropriate sites, equipment, obtaining bees, feeding, swarm control, maintenance, honey extraction, and ending with information on predators, diseases and requeening.  |
| Rearing Queen Honey Bees - 2nd Edition                                    | Morse, Roger A.                    | 1994 | 1-878075-05-5 | This book is the second edition of a guide for those who want to grow a few or many queens. The queen is the most important individual in the colony. She lays eggs and produces the chemical substances which regulate social order in the hive. How well she does these things depends on her physical condition, and this, in turn, depends on the circumstances under which she is reared. The beekeeper who raises queens has a distinct advantage by producing better queens.                                     |
| Making Mead (Honey Wine)  | Morse, Roger A.                    | 1980 | 1-878075-04-7 | History, recipes, methods and equipment.  |
| Honey Bee Pests, Predators, & Diseases 3rd Edition                        | Morse, Roger A. and Flottum, Kim - | 1997 | 0-936028-10-6 | All manner of organisms have a taste for bees, brood, wax or wood, ranging from virus, bacteria, fungi, insects, and mites to mammals. Beekeepers must cope with these attacks on the insects they oversee. This book is a contribution of expertise from 32 experts on understanding and effectively responding to pests, predators, and diseases threatening honey bees.  |

| Title   | Author               | Year                                      | ISBN              | Book Purpose   |
|---|----------------------|---|-------------------|--|
| America's Master of Bee Culture: The Life of L.L. Langstroth  | Naile, Florence      | 1942                                      | 0-8014-1053-3     | A biography of the man who invented the modern beehive now used throughout the world. Rated among the five or six prime founders of modern theory and practice of bee culture, Langstroth was a clergyman who took up beekeeping as a hobby during a period of poor health. In 1851, in the course of his patient experiments with bees, he discovered a new fact about their behavior, and he used his knowledge to design a hive so perfectly adapted to the bee's uses and to the keeper's needs that it revolutionized beekeeping throughout the world. He then developed a system of apiary management and described it in a sound, practical book that became a classic of bee literature. His name was known throughout the beekeeping fraternity. But Langstroth's life had its darker side. Owing partly to the difficulty of protecting his patent rights, he received little financial reward for his ingenious invention, and throughout his life he was troubled by a mysterious nervous ailment that at times made him hate the sight of a bee. Generous quotations from Langstroth's Journal and other writings give a refreshing immediacy to Miss Naile's narrative. Her book is a fitting tribute to the unusual man who took the mystery out of beekeeping. |
| The Story of Honey (Pamphlet)   | National Honey Board |   |                   |  |
| Honey in the Hive   | Nommensen, Etta      | 1980                                      | 0-87691-308-7     | A narrative of the author's beekeeping experiences combined with a how-to manual.  |
| The Bee   | Norden, Dr. Beth     | 1991                                      | 1-55670-218-3     | 3-D illustration of a bee  |
| The Beekeeper's Lament  | Nordhaus, Hannah     | 2011                                      | 978-0-06-187325-6 | Award-winning journalist Hannah Nordhaus tells the remarkable story of John Miller, one of America's foremost migratory beekeepers, and the myriad and mysterious epidemics threatening American honeybee populations. In luminous, razor-sharp prose, Nordhaus explores the vital role that honeybees play in American agribusiness, the maintenance of our food chain, and the very future of the nation. With an intimate focus and incisive reporting, in a book perfect for fans of Eric Schlosser's Fast Food Nation, Michael Pollan's The Botany of Desire, and John McPhee's Oranges, Nordhaus' stunning exposé  |
| American Honey Plants   | Pellet, Frank        | 1976                                      | 0-915698-01-3     | Classic, often-updated book describing American honey plants together with those which are of special value to the beekeeper as sources of pollen.   |
| Build Your Own Beekeeping Equipment   | Pisano, Tony         | 2013                                      | 978-1-61212-059-1 |  |
| Killer Bees   | Potter, Anthony      | 1977                                      | 0-448-12640-0     | A journalist's search for the frightening truth about Brazil's killer bees, a macabre menace to the entire Western Hemisphere.   |
| Practical Aromatherapy: How to Use Essential Oils to Restore Health and Vitality                              | Price, Shirley       | 1994                                      | 0-7225-2850-7     | Aromatherapy is natural therapy which uses pure distilled essential plant oils to improve the health of body and mind. In this book, the author explains every aspect of this approach to healing.   |
| ABC and XYZ of Bee Culture: An Encyclopedia Pertaining to Scientific and Practical Culture of Bees (3 copies) | Root, A.I.           | 1983 (original edition published in 1877) |                   | Since 1877 Leading the Way to Successful Beekeeping. Over 800 pages packed with information. Hundreds of photos and illustrations. A mix of reference, the how and why things are done and a history of how beekeeping got where it is today.  |
| Honey Bee Diseases & Pests - 2nd Edition (2 copies)   | Scott-Dupree, C      | 2000                                      | 0-88955-448-X     | Magazine form. Produced by Canadian Association of Professional Apiculturists.   |
| Honeybee Democracy  | Seeley, Thomas D     | 2010                                      | 978-0-691-14721-5 | How honeybees make collective decisions—and what we can learn from their democratic process  |
| Swarming: Its Control and Prevention  | Snelgrove, L.E.      | 1981                                      | 0905 652 290      |  |
| Anatomy of the Honey Bee  | Snodgrass, R.E.      | 1978                                      | 0-8014-0400-2     |  |

|---|------------------------------------|------|-------------------|---|
| Fat Bees, Skinny Bees: A Manual on Honey Bee Nutrition for Beekeepers | Somerville, Doug                   | 2005 | 1-74151-152-6     | Honey bee nutrition is a developing area of research. RIRDA funded this publication that is beekeeper friendly, drawing together research on the subject of honey bee nutrition. This publication is particularly relevant to Australian beekeeping.  |
| The Complete Idiot's Guide to Beekeeping (2 copies)                   | Stiglitz, Dean and Herboldsheimer, | 2010 | 978-1-61564-011-9 | This guide includes expert advice on acquiring bees and establishing a hive; tips on caring for bees without chemical treatments or artificial feeds; guidance on inspecting your hives and knowing what to do if things go wrong; a look at the most common mistakes new beekeepers make and how to avoid them; an explanation of where to buy and what to feed your bees; a thorough exploration of diseases, parasites, and other hive problems and how to treat them; and hints on how to harvest honey and make money. |
| Timing of Miticide Applications (3 copies)                            | Strange, James P; Sheppard, Walte  | 2001 |                   | Paper published by Entomological Society of America   |
| Breeding Super Bees   | Taber, Steve                       | 1987 |                   | The book describes the author's wide experience in practical beekeeping to the problems of breeding.  |
| Comb Honey Basics   | Taylor, Richard                    | 1995 |                   | A small book that sets forth the basic principles of comb honey beekeeping built on the ideas that you can without complex and difficult systems of management produce beautiful comb honey by 1) having strong colonies all the time and 2) controlling swarming.  |
| The Joys of Beekeeping  | Taylor, Richard                    | 1974 | 0-312-4459-3      | Books on apiculture describes how to produce honey but they neglect to note how beautiful it is. They explain how to tend bees but they do not say how joyous this can be. They describes swarms but say nothing of how inspiring it is to behold one. This is the purpose of this book - the author tries to give an intimation of the sources of happiness that beekeepers have discovered and to convey his own philosophy that is closely interwoven with his beekeeping.   |
| The How to Do It Book of Beekeeping                                   | Taylor, Richard                    |      |                   | Copy of a book in a binder  |
| Attracting Native Pollinators   | The Xerces Society Guide           | 2011 | 978-1-60342-695-4 | Bees, wasps, butterflies, moths, flies, and some beetles pollinate more than 70% of flowering plants, but North America's native pollinators face multiple threats to their health and habitat. The Xerces Society offers a complete action plan for protecting these industrious animals by providing flowering habitat and nesting sites.   |
| Bee Chats, Tips and Gadgets (3 copies)                                | Thurber, P.F. (Roy)                | 1986 |                   | Compilation of columns written by P.F. (Roy) Thurber published in the American Bee Journal covering the management of bees, basic and special equipment, swarming, requeening, extracting honey, and other beekeeping topics.   |
| Garden Way's Practical Beekeeping                                     | Tompkins, Enoch and Roger Griffith | 1977 | 0-88266-091-8     | This book gives beginners easy-to-understand guidance. It also provides a wealth of information for the more advanced beekeeper.  |
| Honey: The Gourmet Medicine   | Traynor, Joe                       | 2002 | 0-9604704-1-7     | Folk medicine lore is replete with tales of the curative properties of honey. Now numerous studies document honey's medicinal properties providing ample supporting evidence for anecdotal claims. Honey is an effective treatment for a variety of ailments. This book summarizes the medicinal value of honey and explores honey as a gastronomic treat.  |
| Confessions of a Bad Beekeeper  | Turnbull, Bill                     | 2010 | 978-1-61519-032-4 | Confessions of a Bad Beekeeper chronicles Turnbull's misadventures (and brief moments of triumph) in the curious world of backyard beekeeping--and also highlights both the threat to our bee population and what we can do to help these vital little creatures do their wonderful work.   |
